

Airport environmental adviser

Environmental advisers help an aviation organisation understand and manage its environmental obligations and performance. The employer matters: Airservices is an air-navigation and rescue-firefighting service organisation; Cleveland is an airport-system employer. Advice, programme management and specialist field work may sit in different posts. Neither example represents a universal airport environmental qualification.

Other titles to compare: Airport environmental advisor, Aviation environmental specialist where duties align. Titles alone do not establish equivalent duties.

What the role does

- Maintain environmental plans, records and management-system information.
- Analyse environmental information and explain findings to operational and project colleagues.
- Support compliance-related projects and coordinate with relevant specialists.

Where the work happens

Airport-system offices and field locations, or an ANSP environment team supporting facilities and projects; this is not always direct airport employment.

Employer example 1

Airservices Australia • Australia • Environmental Advisor - 502779, Brisbane

Closed vacancy historical example • Checked 2026-10-27 [EMP1]

Category	What this employer states
Essential in this source	Relevant environmental qualifications; the advert does not state a degree level. Experience with environmental systems, compliance or projects; stakeholder, analytical, coordination and Office skills. Australian citizenship and Baseline security clearance are conditions of this particular post.
Desirable in this source	Power BI or ESRI GIS experience is highly regarded.
Other stated conditions	An 18-month fixed-term post; recruitment closed in September 2026.

Selected conditions from this employer and role only; not a complete eligibility checklist or worldwide rule.

Employer example 2

City of Cleveland - Cleveland Airport System • United States • Airport Environmental & Sustainability Assistant Manager - 10695-HR

Closed vacancy historical example • Checked 2026-10-27 [EMP2]

Category	What this employer states
Essential in this source	Two years of an equivalent combination of education, training and programme-administration experience; Ohio driving licence. Office skills, on-call availability and relevant field experience; employer screening and physical conditions also apply. Complete required ground-vehicle training during probation and maintain airfield driving privileges.
Desirable in this source	Bachelor degree; environmental credentials, airport experience, extended environmental-compliance experience and public-procurement experience.

Category	What this employer states
Other stated conditions	A separate certifications list does not clearly label each item required or preferred; consult the full notice. This assistant-manager post is not the same seniority as every adviser role.

Selected conditions from this employer and role only; not a complete eligibility checklist or worldwide rule.

PREPARE AND VERIFY

Separate requirements from preparation

Organisation and task requirements; full legal applicability unresolved: Environmental duties can involve different facility permits, workplace training and professional responsibilities. The employer notices are evidence of recruitment conditions, not a complete statement of Australian or US law. BLS describes a typical education pattern; it does not create a personal airport-environmental-adviser licence. [EMP1, EMP2, REF1]

Still to verify: Two employer examples are verified but both are closed and differ in seniority. Complete local permit, professional-registration and task-training applicability remains unresolved.

Explore a realistic entry route

- Separate environmental advice from a specialist scientist's sampling, engineering sign-off or emergency-response duties. Identify the employer, work locations and exact responsibilities before choosing a qualification.
- Develop a credible foundation through relevant study and supervised environmental or project work. Use the advert's actual education alternatives: do not turn a preferred bachelor degree into an absolute condition, or assume a qualification without a stated level must be a degree.
- Compare current vacancies and ask how site induction, competence checks, field-work authorisation and supervision are arranged. Check who funds required training and whether the post is genuinely entry-level before purchasing courses.

Build evidence of your skills

- Create a fictional office resource-use register with units, data sources, missing values and review dates. Explain what the data cannot establish; do not invent a regulatory compliance conclusion.
- Write a one-page plain-language briefing on an invented environmental project, separating the objective, evidence, uncertainties and questions for a qualified specialist.

Prepare for an interview

Reflection prompts only, not questions claimed to be used by an employer.

- Preparation prompt: describe a genuine occasion when you explained technical information to people with different priorities. Show how you checked understanding without overstating certainty.
- Prepare questions about the division between advisory and authorised field duties, supervision, the environmental management system and success measures. These are not reported employer interview questions.

Investigate possible next roles

Research specialist environmental analysis, project leadership or sustainability management as possible later directions. Scientific, engineering or regulatory-authority responsibilities may require a separate qualification and appointment.

Sources and scope
